MEMORANDUM TO: Directors of Education
Primary, Junior, and Science
Co-ordinators and Consultants
Principals of Elementary Schools
Principals of Secondary Schools

FROM: Shannon A. Hogan

DATE: September, 1988

SUBJECT: Inventory of Ontario Women in
Scientific and Technical Fields

In October 1986, the Minister of Education released Science In Primary and Junior Education: A Statement of Direction. Included in this document is a list of twenty-four initiatives to be implemented to support the renewal of Primary and Junior science education in both English- and French-language schools in Ontario.

The Centre for Early Childhood and Elementary Education is responsible for implementing initiative 12.

"The Ministry will publish an inventory of Ontario women in scientific and technical fields who are available to speak to children."

Inventory of Ontario Women in Scientific and Technical Fields, the document which accompanies this memorandum, is the result of this initiative. It was developed by using, as a base, a registry of women in scientific and technical fields that was initiated by the Science Council of Canada. The inventory was

SUBJECT: Inventory of Ontario Women in
Scientific and Technical Fields

In October 1986, the Minister of Education released Science In Primary and Junior Education: A Statement of Direction. Included in this document is a list of twenty-four initiatives to be implemented to support the renewal of Primary and Junior science education in both English- and French-language schools in Ontario.

The Centre for Early Childhood and Elementary Education is responsible for implementing initiative 12.

"The Ministry will publish an inventory of Ontario women in scientific and technical fields who are available to speak to children."

Inventory of Ontario Women in Scientific and Technical Fields, the document which accompanies this memorandum, is the result of this initiative. It was developed by using, as a base, a registry of women in scientific and technical fields that was initiated by the Science Council of Canada. The inventory was

completed by surveying the following professional organizations for the names of Ontario women in scientific and technical fields who would be willing to speak to pupils in Ontario schools:

Association of Professional Engineers of Ontario
Canadian Federation of Women in Engineering,
Science and Technology
Canadian Women in Science
Ontario Women's Directorate
Transport Canada, Toronto
Women in Science and Engineering
Women in Trades

The inventory includes a list of professions and trades, along with a list of curriculum areas from the new science document, Science Is Happening Here: A Policy Statement for Science in the Primary and Junior Divisions. It is designed to assist teachers in obtaining, within their geographical areas, speakers with expertise related to the learning opportunities set out in Science Is Happening Here.

One copy of the inventory is being distributed to each English- and French-language elementary school in the province. As well, copies are being forwarded to school board offices for the use of board personnel with responsibilities in Primary and Junior science.

In addition, one copy of the inventory is being sent to each English- and French-language secondary school in Ontario since many of the resource personnel listed indicated their interest in speaking to students in the Intermediate and Senior Divisions. Secondary school teachers, therefore, may find this inventory a useful resource for their own science programs.

This inventory is not meant to be seen as complete. The loose-leaf format allows schools and/or school boards to add to the list of resource personnel. Schools are encouraged to survey their communities for the names of local women with expertise in scientific and technical fields in order to expand the range of the categories of activities mentioned.

School boards or individual schools may want to develop a procedure to coordinate requests in order to prevent an undue number of individual calls to one person.

FOREWORD

In October 1986, the Minister of Education released *Science in Primary and Junior Education: A Statement of Direction*. Twenty-four initiatives to support the renewal of Primary and Junior Science education are set out in this publication.

Inventory of Ontario Women in Scientific and Technical Fields is the result of one of these initiatives. It includes the names of Ontario women in scientific and technical fields who would be willing to speak to children in Primary and/or Junior Divisions. The inventory was compiled from a registry of women in scientific and technical fields that was developed by the Science Council of Canada and from lists provided by the following professional organizations:

Association of Professional Engineers of Ontario
Canadian Federation of Women in Engineering, Science and Technology
Canadian Association for Women in Science
Ontario Women's Directorate
Transport Canada, Toronto
Women in Science and Engineering
Women in Trades

The Ministry of Education is grateful to these organizations for their assistance in the preparation of this inventory.

The *Inventory of Ontario Women in Scientific and Technical Fields* includes a list of professions and trades, along with a list of curriculum areas from the new science document *Science Is Happening Here: A Policy Statement for Science in the Primary and Junior Divisions*. It provides teachers with an initial list of speakers, drawn from their boards' geographical areas, with expertise on topics that are set out in *Science Is Happening Here*.

Many of the resource personnel listed are interested in speaking to both elementary and secondary school students in science programs. The inventory, therefore, may assist secondary school science teachers in finding resource people, within their own geographical areas, who would be willing to address students in secondary school science programs.

This booklet has been published in a loose-leaf format to encourage schools and/or school boards to add to it. By consulting parents and other members of the community, including people in business and industry, school boards or schools may obtain the names of additional resource people. When developing a list of local resource people, science and technology should be interpreted in the broadest sense (for example, medicine, plumbing, carpentry, agriculture, nutrition).

It is essential that the school curriculum continue to emphasize that women in today's society are entering non-traditional careers in scientific and technical fields. This document has been developed to help and encourage educators to provide such role models for their students.

SCIENCE CURRICULUM AREAS
AND RELATED PROFESSIONS AND TRADES

Science curriculum areas are listed in three groups:

- life science,
- earth and space science,
- physical science.

The following tables show the curriculum areas (for example, 'Use of hand lens and microscope' under Life Science Curriculum Areas) and the related professions and trades (for example, Biology or Biochemistry) from which a representative could be invited. The professions related to a curriculum area are marked with an 'X'.

PROFESSIONS

**SCHOOL BOARDS
SERVED BY THE REGIONAL OFFICES
OF THE MINISTRY OF EDUCATION**

The school boards are listed by regions and subregion/county. For example, the Brant County Board of Education is listed in the Central Ontario Region in the subregion/county of Brant. The Scarborough Board of Education is listed in the Central Ontario Region in the subregion of Metropolitan Toronto.

Central Ontario Region

Brant

SPEAKERS

FOR EACH REGION

The speakers are listed by region (for example, Eastern Ontario), subregion/county (for example, Ottawa-Carleton), and profession/trade (for example, computer science). For each speaker, the following information is provided:

- name
- telephone number where the speaker may be reached
- city where the speaker works (for example, Ottawa)
- participant prepared to speak at:

P	Primary Division (junior kindergarten to grade 3)
J	Junior Division (grades 4 to 6)
I	Intermediate Division (grades 7 to 10)
S	Senior Division (grades 11 to OAC)

SC	Science Classes
CW	Career Weeks
PA	Panel Discussions
PD	Professional Development Days

- participant is prepared to speak in:
